

SUMMARY

I have strong skills across many areas of labeling and now have **15 minutes of experience**. My strengths are **face_90** and **body**, as I focus primarily on **Gorilla** labeling. Currently, I am focused on **creating data**. ~~Colleagues have said that I don't label that much and work on light software and other hobby projects.~~

PERSONAL DETAILS

Name: Michael Moritz Konrad Müller
Date of Birth: 06.07.1967
Address: Stahnsdorfer Strasse 67, 14482 Potsdam
Email: mik.mueller@student.hpi.de

TECHNICAL SKILLS

Labeling: CVAT, Pen and Paper
Tools: Polluting the Office, Not doing work

EXPERIENCE

Burker King Potsdam
Systems Administrator *December 2023 — March 2024*

- Ensured reliable operations across lab hardware and software, including monitoring, updates, and incident response

Fortnite Berlin
Full-Stack Platform Engineer *May 2024 — Present*

- Building an in-house 67 Platform

EDUCATION

Carl-Fuhlrott-Gymnasium Wipperfürth
Abitur (General University Entrance Qualification) **Note: 3.7** *August 2015 — June 2023*

Hasso Plattner Institute Potsdam
B.Sc. IT-Systems Engineering
September 2023 — September 2027

SELECTED PROJECTS

Office Chair Racing Neural Network PyTorch, zip ties, squeaky wheels, borrowed GPU time
Dataset lost under desk *October 2022 — May 2023*

- Trained a **chair velocity prediction model** on hallway laps, blurry phone videos, and deeply biased stopwatch labels
- Collected **highly questionable training data** by pushing an office chair around and calling the crashes edge cases
- Implemented a braking classifier with **three labels**: safe, unsafe, and already too late
- Reported a 99% accuracy score after accidentally testing on the same hallway used for training

Sandwich Recommendation Foundation Model Python, crumbs, YAML, overfitting, cosine similarity, and mustard
Deployed to lunch *February 2022 — Present*

- Fine-tuned a **large sandwich model** to recommend lunch based on hunger level, fridge contents, and random noise
- Built an embedding pipeline that maps **cheese, bread, and regret** into the same vector space
- Maintained a strict evaluation benchmark of **eventual lunch**, measured in minutes, excuses, and crumbs
